

PVCu Residential Doors

Available in Single Door, Stable Door and French Door styles

Curve
Edge
Esteem

Available in Edge, Curve and Esteem suites, a matching uPVC door is the ideal way to complete your home's look. Maintenance free and durable, these doors are available in a range of styles including Single door, French door and Stable door.

Single doors make for an attractive replacement front or back door. Doors can be configured to open inwards or outwards depending on your property. For larger openings, a French door is ideal to bring in the maximum amount of light and warmth. A Single door or French door coupled together with glazed side screens, create a beautiful finish.

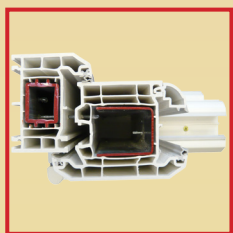

A Stable door is cleverly designed to allow the top half of the door to open while the bottom remains closed - allowing in plenty light and fresh air whilst provided added security. The door can also be opened and closed as a full unit, ensuring nothing gets in the way of your daily routine.

Secure multipoint locking is fitted as standard to our entire door range, giving you peace of mind. You can customise your look with a choice of decorative glass, solid panel options and complementary door furniture - including a cat flap, which ensures that each door is tailor made to suit you. A semi glazed option enables you to let in that much more light in areas such as dark entrances. For that added privacy, you may opt for a full panelled door- ideal for shared access passageways. There is a multitude of possibilities, so why not ask your advisor about the options that work for you?
